

ATMA RAM SANATAN DHARMA COLLEGE (UNIVERSITY OF DELHI)

Technology Business Incubator

The Technology Business Incubator (TBI) at ARSD College is dedicated to fostering a culture of innovation and entrepreneurship among students, researchers, and faculty. It serves as a platform for nurturing early-stage ideas by providing mentorship, infrastructural support, and access to a conducive ecosystem that encourages creativity, experimentation, and enterprise development. Acting as a vital bridge between academia and industry, the TBI facilitates the transformation of innovative concepts into viable and sustainable ventures.

During the Academic Year, the TBI Committee focused on strengthening the institutional framework for entrepreneurship by emphasizing capacity building, structured mentoring, and the development of a supportive incubation environment. Efforts were directed towards promoting interdisciplinary collaboration, encouraging student-led innovation, and aligning entrepreneurial initiatives with emerging industry trends and societal needs.

In September 2025, the College entered into a MoU with AKMV Consultants Pvt. Ltd. for mentoring student start-ups. Under this collaboration, structured guidance, expert mentoring, and strategic support will be extended to budding entrepreneurs to help them refine business ideas, develop scalable as well as sustainable ventures.

In line with the broader institutional vision and IQAC-led initiatives, the TBI continued to contribute towards enhancing skill development, innovation orientation, and employability among students. Through these ongoing efforts, the TBI aims to evolve as a dynamic hub for innovation, supporting aspiring entrepreneurs in translating ideas into impactful ventures.
