

ARSD College, University of Delhi

Model Course Handout/Lesson Plan

Course Name : B.Sc. (Hons) chemistry						
Semester	Course Code	Course Title	Lecture (L)	Tutorial (T)	Practical (P)	Credit (C)
I	32171102 CHEMISTRY - C I: INORGANIC CHEMISTRY - I	Atomic Structure & Chemical Bonding	2			2
Teacher/Instructor(s)		Dr. Shivangi Sharma				
Session		2021-22 (Nov-March)				

Course Objective:

The course reviews the structure of the atom, which is a necessary pre-requisite in understanding the nature of chemical bonding in compounds. It provides basic knowledge about ionic, covalent and metallic bonding and explains that chemical bonding is best regarded as a continuum between the three cases. It discusses the periodicity in properties with reference to the s and p block, which is necessary in understanding their group chemistry.

Course Learning Outcomes: By the end of this course, students will be able to:

- Solve the conceptual questions using the knowledge gained by studying the quantum mechanical model of the atom, quantum numbers, electronic configuration, radial and angular distribution curves, shapes of s, p, and d orbitals, and periodicity in atomic radii, ionic radii, ionization energy and electron affinity of elements.
- Draw the plausible structures and geometries of molecules using Radius Ratio Rules, VSEPR theory and MO diagrams (homo- & hetero-nuclear diatomic molecules).
- Understand the concept of lattice energy using Born-Landé and Kapustinskii expression.
- Rationalize the conductivity of metals, semiconductors and insulators based on the Band theory.
- Understand the importance and application of chemical bonds, inter-molecular and intramolecular weak chemical forces and their effect on melting points, boiling points, solubility and energetics of dissolution.

Lesson Plan:

Unit No.	Learning Objective	Lecture No.	Topics to be covered
1.	Chemical Bonding	1-2	Ionic bond: General characteristics, types of ions, size effects, radius ratio rule and its limitations. Packing of ions in crystals.
		4-6	Born-Landé equation with derivation and importance of Kapustinskii expression for lattice energy.
		7-8	Madelung constant, Born-Haber cycle and its application, Solvation energy.
		9-10	Covalent character in ionic compounds, polarizing power and polarizability. Fajan's rules and consequences of polarization.
2.	Covalent bond	11-13	Valence Bond theory (Heitler-London approach). Energetics of hybridization, equivalent and non-equivalent hybrid orbitals. Bent's rule, Resonance and resonance energy.
		14-16	Ionic character in covalent compounds: Bond moment and dipole moment. Percentage ionic character from dipole moment and electronegativity difference.
		17-20	Molecular orbital theory. Molecular orbital diagrams of diatomic and simple polyatomic molecules N ₂ , O ₂ , C ₂ , B ₂ , F ₂ , CO, NO, and their ions; HCl (idea of s-p mixing and orbital interaction to be given).
3.	VSEPR Theory	21	Lewis structure, Valence shell electron pair repulsion theory (VSEPR)
		22-23	Shapes of the following simple molecules and ions containing lone pairs and bond pairs of electrons: H ₂ O, NH ₃ , PCl ₃ , PCl ₅ , SF ₆ , ClF ₃ , I ₃ ⁻ , BrF ₂ ⁺ , PCl ₆ ⁻ , ICl ₂ ⁻ , ICl ₄ ⁻ , and SO ₄ ²⁻ . Multiple bonding (σ and π bond approach) and bond lengths
		24-25	Contd... Shapes of the following simple molecules and ions containing lone pairs and bond pairs of electrons: H ₂ O, NH ₃ , PCl ₃ , PCl ₅ , SF ₆ , ClF ₃ , I ₃ ⁻ , BrF ₂ ⁺ , PCl ₆ ⁻ , ICl ₂ ⁻ , ICl ₄ ⁻ , and SO ₄ ²⁻ . Multiple bonding (σ and π bond approach) and bond lengths
4.	Metallic Bond & Weak Chemical Forces	26-27	Qualitative idea of valence bond and band theories. Semiconductors and insulators, defects in solids.
		28-29	van der Waals forces, ion-dipole forces, dipole-dipole interactions, induced dipole interaction, Hydrogen bonding (theories of hydrogen bonding, valence bond treatment).
		30	Effects of weak chemical forces, melting and

			boiling points, solubility, energetics of dissolution process.
--	--	--	--

Evaluation Scheme:

No.	Component	Duration	Marks
1.	Internal Assessment		25
	• Quiz		
	• Class Test		
	• Attendance		
	• Assignment		
2.	End Semester Examination	3 hr	75
